RARE SEEDS

from

Baja California, Mexico

#223. *Agave Dattyllo*,—A medium size plant with dark green foliage. Is a very attractive garden plant. From La Paz.

#7. *Cochemeia Poselgeri*,—From a genus occurring only in Baja California. Resembles a loosely branched *Echinocereus* in growth. Body of plant often reddish. Spines really hooked. Flowers shaped like a *Zygocactus*, but a vivid scarlet. From La Paz.

#37. *Ferocactus Townsendianus*,—A very attractive, medium size barrel cactus from south of La Paz.

#41. *Ferocactus*?,—A very tall, slender barrel cactus from either Todos Santos or the Magdalena Plain as preferred.

#43. *Ferocactus*?,—A medium size plant with very heavy, flattened, hooked, red spines. From Calmalli.

#129. *Ferocactus Rectispinus*,—A very rare, medium size plant, with very long straight spines. We have collected spines over 10 inches long. From the Sierra Giganta.

#81. *Opuntia Ciribe*,—a cholla to two and one half feet high, dark green body, white spines, yellow flowers and fruit. Very attractive, From Comondu Viejo.

#86. *Opuntia Invicta*,—In growth resembles an *Echinocereus*. Very heavy, angled spines. Flowers and fruit yellow. Magdalena Plain.

#112. *Opuntia Tesajo*,—a slender, procumbent variety usually growing up through other plants. Fruit is rose pink. Comondu or Magdalena Plain.

#111. *Opuntia*? probably *Peresklopsis Porteri*. A climbing variety growing over other plants to a height of 15 feet. Long, orange colored fruit. Very desirable. From Miraflores.

#70. *Neomammillaria*?,—Tall thick bodied, cespitose, white with a few dark hooked spines, yellow flower, red fruit. From San Jose del Cabo.

#74. *Neomammillaria Armillata*?,—Tall slender, cylindric plants. San Jose del Cabo.

#100. *Pachycereus pecten-aborigenum*,—A slender, much branched giant cactus. Flowering portion of branches very spiny.

Prices are postpaid. Minimum order \$1.00.

HOWDY FOLKS:

I am through rambling around in Mexico for a while and I am hard at work collecting Southwestern varieties. I specialize in small sizes for bowls and little pots. That does not mean I cannot send you some big ones. The sky is the limit if you say so. Right now I am working a good district in Nevada where the kinds listed below grow. Before the summer is over I will work in three or four districts so there will be other kinds too. This is a one man concern which means that everything gets personal attention, the plants are carefully handled and costs are kept down so the selling price will be right.

If these names are just so much Hog Latin to you just send me a check anywhere in size between two and ten dollars and I will send you a box full all labeled and priced. Then you can send me your bigger orders for the kinds you like best.

Echinocereus engelmannii (Hedgehog cactus)

Opuntia erinacea (O. Ursina) (Grizzly Bear)

Echinomastus erectocentrus

Small sizes at \$3.50, \$5.00, \$7.50, \$10.00, and \$15.00 per 100.

Coryphantha desertii (*Mammillaria desertii*)

Ferocactus johnsonii (*Echinocactus johnsonii*)

Ferocactus acanthodes (*Echinocactus cylindraceus*) (Barrel Cactus)

Opuntia basilaris (Beaver Tail)

Small sizes at \$5.00, \$10.00, \$15.00, and \$25.00 per 100.

Echinocereus mojavensis

Opuntias of the cylindric or cholla type assorted.

Opuntias of the flat jointed or tuna type assorted.

Small sizes at \$10.00, \$15.00, and \$25.00 per 100.

Echinocactus polycephalus

Opuntia parishii, creeping opuntia.

Opuntia chlorotica, fine, drooping, yellow spines.

Phellosperma tetrancistra

25 cents each and up.

Small single headed *Clistoyucca arborescens* (Joshua palm) at 25, 35, and 50 cents each.

TERMS:

All plants bare root.

Packing free.

Unless otherwise ordered shipment is by express collect.

Unknown customers cash with the order or C. O. D.
